United states V. Global partners lp, et al., D.J. Ref. no. 90-5-1-11428

To whom it may concern, My name is Barbara Saulle. I live at [Redacted]
I reside with my husband Anthony Saulle, My 2 sons Jonathan and Justin and i have my grand child half of the time
And we have pets. We've lived at this address for 12 years and have many health issues.
I myself knew something was wrong in this area, I have been very sick since living here.
I have IGA Syndrome / Kidney failure, I've had 2 mis carriages, Breathing and sleeping problems,
Vision problems, Memory loss, Migraine headaches that have increased drastically over the last few years.
My health is not good at all, I also have auto immune issues they're still testing me for.
My husband has a loss of smell, Not complete but heavily lost. He's had multiple polliips removed
from his nose/sinus and has to have a mass above his forehead removed soon,
He was scheduled for 4/23/19 for this surgery but was rescheduled for June.
My older son has severe sinus issues and his liver enzymes are elevated which are
still being evaluated and were of concern of his doctor.
My younger son also went through the same issue on a smaller scale.
We lost a dog who was only 5 years old due to cancer through out his whole body.
I've called global in the past, 2 years ago a lady called back and said I'd get a return call but never did.
I've made several complaints about the horrific smells that come from global and we live right across from them.
We were not made aware of this issue until the last meeting at city hall which I watched on television.
Due to finding out last minute I haven't had time to go over this with my lawyer but submitted this in good faith.
2 ladies came by and I spoke with them about the issues that's I've had and shared pictures/complaints with them.
I clean the beach that sits between us and global in hopes of that clearing up the smell but that was not the issue.
I was never made aware of replacement of vents or any other compensation and with all the pain and suffering
we've endured we should have been one of the first they reached out to considering how close we are to them
And since I've complained to their corporate office in the past.
Please let me know where someone like ourselves, The real people being affected for over a decade from global
Releasing toxins that we have been breathing for all this time and have legitimate health problems
That I believe they are liable for. I do have pictures which the lady from the city used to speak on our behalf.
I was recently approved for disability due to all of my health problems so we are on low income
But my husband is a hard worker and being sick all the time is not easy.
I have proof of my health issues and my life is so much different since moving here and I'm only 52.
In all of my pictures you can clearly see the smoke or anything else they're letting into the air
Comes directly in our houses direction.
We are afraid to have our 3 year old grand daughter be affected by all of this as well.
Even though we've lived in our family owned home and have special memories here and love the area
we will have to consider moving if drastic changes are not made, She has already been exposed for 3 years at her young
age.
I can be reached at [Personal Matters / Ex. 6] Cell phone) or [Personal Matters / Ex. 6] (home) please leave voice mail.
or Barbarasaulle207@yahoo.com
Thank you very much, Barbara Saulle
